

BassJump 2

portable subwoofer for MacBook

A bass boost just for MacBook.

Designed exclusively for MacBook Pro and Air, BassJump 2 is a sweet, one-of-a-kind, go anywhere, USB-powered subwoofer that turns your MacBook into a mini-sound system. One single USB cable delivers power and sound. Custom software blends the music coming from your built-in MacBook speakers with extra bass. The result is dramatically improved MacBook sound performance.

Key facts:

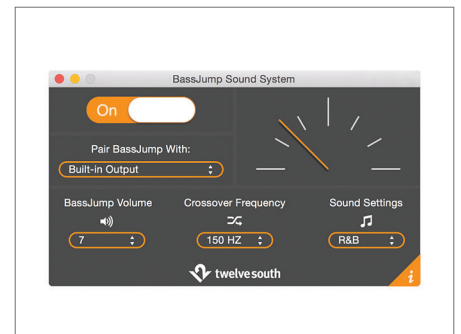

- USB powered subwoofer designed for MacBook Air, MacBook Pro, and MacBook Pro with Retina Display
- Dramatically improves the sound performance of your MacBook speakers
- One USB connection provides both power and digital audio to BassJump- no batteries to charge or power adapters to remember

Compatibility:

- Works with MacBook, MacBook Air, MacBook Pro, and MacBook Pro with Retina Display
- BassJump Sound System software is available at twelvesouth.com/bassjump
- Software compatible with OS X 10.6 or later

What's in the box?
