

Accessories designed *exclusively* for Apple. **Period.**

We design accessories exclusively for Apple products. Twelve South has been designing beautiful accessories exclusively for Apple products since 2009. Our small company, right around twelve employees, develops surprising new ways to protect and personalize your Apple hardware.

We're big on tiny details, little nuances and millimeters that transform our products into must-have items. Each product we make is backed up by top notch customer service – delivered by real human beings.

From day one, we have been committed to serving the legions of people who, just like us, line up in front of an Apple store to buy the latest and greatest Apple product. We plan to stay the course, designing products as innovative as Apple itself.

We want to be your go-to source for gear made exclusively for Apple.

Thank you for taking the time to look at our products. We're confident you'll like them even better when you give them a try. We look forward to having you join our tribe of loyal fans.
