

Requires half the height of typical vertical placement

BookArc for Mac Pro

horizontal desktop stand for Mac Pro

Coordinates with your room as well as it matches your Mac.

BookArc Pro is a chrome stand made exclusively to cradle Mac Pro. Crafted from metal, this elegant throne holds Mac Pro securely on its side to operate horizontally vs. the typical upright position. This trims the Mac Pro's height requirement in half, giving you more placement options — like a secure equipment rack or a free studio shelf. BookArc also gives your Mac Pro a radically different look that some who “think different” may actually prefer. It's a space saver that makes Mac Pro look like a jet engine... ready to launch your next Mac Pro-driven project into orbit.

Key facts:

- Holds Mac Pro securely on its side and prevents it from rolling
- Soft silicone insert cradles Mac Pro without scratching
- Lower profile fits on shelves, cabinets or equipment racks

We're not just Mac *friendly* – we're Mac **only**.  **twelve south**
