## BookArc for MacBook

“Twelve South's new and improved BookArc is an architectural masterpiece. A single arc of beautifully crafted metal now fits every single MacBook Apple currently makes. It does so using various sizes of interchangeable silicone inserts which are all included inside the box. This makes the new BookArc immensely versatile and future-proof should you decide to get a different MacBook. I know I do.”

“BookArc is perfect for you who use your laptop with an external monitor and want to save space on the desktop.”

– [Array Sweden](#)

“If you use a MacBook in clamshell mode, the Twelve South BookArc is well worth checking out. Its simple, unobtrusive design allows it to blend in to any office or room, and it frees up a lot of space on a desk by letting a MacBook sit vertically.”

“...The BookArc is another really good product from Twelve South. It’s beautiful and functional, like many of their products tend to be. The BookArc gets your MacBook up and off of your desk to both free up desk space and show it off to the world... **The BookArc is my favorite laptop stand solution.**”

“To my eyes, the new BookArc looks nicer than its predecessors, in large part because of the chamfered edges. They’re a classy touch.
